Once Fabricated

The GRBCC extension Phase 2 Expansion adds 401,500 square feet of exhibit space to the existing facility in downtown Houston. Cleveland Bridge International Ltd. were contracted to detail, supply, fabricate and deliver approximately 6,000 tons structural steelwork for the project. Fabrication work was carried out in the Peoples Republic of China to AWS standards, under CBIL supervision, providing significant cost and time benefits to the client. Deliveries were completed over two months ahead of schedule without additional cost.

CBIL is uniquely placed to deliver such projects with over ten years of experience in the manufacture and export of high quality structural steelwork from the PRC. CBIL is part of the Cleveland Group of Companies. It's extensive local knowledge and bi-lingual, culturally attuned staff gives clients the assurance of contracting with an internationally acclaimed engineering and fabrication company whilst obtaining significant savings over domestic supply prices.
